DECISION

MPA/145039

PRELIMINARY RECITALS

Pursuant to a petition filed November 5, 2012, under Wis. Stat., §49.45(5), to review a decision by the Division of Health Care Access and Accountability (DHCAA) to modify a Medical Assistance (MA) authorization for personal care worker (PCW) services, a hearing was held on January 4, 2013, by telephone. A hearing set for November 28, 2012 was rescheduled at the petitioner's request.

The issue for determination is whether the DHCAA authorized appropriate PCW hours.

FINDINGS OF FACT

1. Petitioner is a 22-year-old resident of Rock County who receives MA.
2. Petitioner has cerebral palsy with contractures. She requires substantial assistance in activities of daily living, and she has been receiving PCW services of 38.5 hours per week.
3. On September 13, 2012, Accura Home Health requested authorization for 38.5 hours per week PCW services for a one-year period effective October 19, 2012, PA no. [REDACTED]

4. After reviewing the personal care screening tool, the DHCAA granted 34.25 hours per week. The DHCAA allowed maximum time for bathing, dressing, AFO placement/removal, grooming, meal set up, toileting, transfer assistance, range of motion, and incidental services.

DISCUSSION

Personal care services are “medically oriented activities related to assisting a recipient with activities of daily living necessary to maintain the recipient in his or her place of residence in the community.” Wis. Admin. Code, §DHS 107.112(1)(a). Covered services include the following:

1. Assistance with bathing;
2. Assistance with getting in and out of bed;
3. Teeth, mouth, denture and hair care;
4. Assistance with mobility and ambulation including use of walker, cane or crutches;
5. Changing the recipient's bed and laundering the bed linens and the recipient's personal clothing;
6. Skin care excluding wound care;
7. Care of eyeglasses and hearing aids;
8. Assistance with dressing and undressing;
9. Toileting, including use and care of bedpan, urinal, commode or toilet;
10. Light cleaning in essential areas of the home used during personal care service activities;
11. Meal preparation, food purchasing and meal serving;
12. Simple transfers including bed to chair or wheelchair and reverse; and
13. Accompanying the recipient to obtain medical diagnosis and treatment.

Wis. Admin. Code, §DHS 107.112(b).

Personal care workers can spend no more than one-third of their time performing housekeeping activities. Like all medical assistance services, PCW services must be medically necessary and cost effective. Wis. Admin. Code, §DHS 107.02(3)(e)1 and 3.

The DHCAA approved 34.25 hours of PCW services each week for the petitioner. To reach this figure the DHCAA used the Personal Care Screening Tool, a computer program it believes will allow it to consistently determine the number of hours required by each recipient. The screening tool allots a specific amount of time in each area the recipient requires help, which the DHCAA’s reviewer can then adjust to account for variables missing from the screening tool’s calculations.

The reason that the tool is used is evident in a case such as this one. Petitioner’s representatives did not provide specific times necessary for providing the PCW services, but instead testified that more time was needed than the maximums because of petitioner’s unique circumstances and needs. Nothing was quantified. Without a better way to quantify the time for services, however, I find it difficult to add more time. The problem with family members being the personal care workers is that it is that they may take more time to do care tasks due to inexperience or carelessness, and thus the Department has set maximum times for a typical care worker. In addition, while it is true that 38.5 hours was authorized in the past, it is likely that this request was the first one reviewed thoroughly by the DHCAA.

The one area that concerns me is toileting because petitioner has to be carried upstairs to use the bathroom. However, the tool allows 60 minutes per day for toileting, so I cannot conceive how that is insufficient, especially given that petitioner is out of the home daily five days per week, and it is almost certain that daily bathing and dressing also would encompass toileting to some extent.

At this point I cannot conclude that the amount authorized is insufficient because petitioner's caregivers have not quantified a need for more time. If they can do so, they can always request an amendment to the authorization with documentation to show the need for more hours.

CONCLUSIONS OF LAW

The DHCAA correctly determined PCW hours based upon its screening tool.

THEREFORE, it is ORDERED

That the petition for review herein be and the same is hereby dismissed.
