Subject: Access tomPublic Records

I would like to comment on recent moves by the Board to limit access to electronic communications. The Public must retain the right to view electronic messages, so that they know what their public officials are up to.

It is very disturbing to think of the things they might try to do behind taxpayer's backs if they don't have to produce these records. Please rescind your previous actions of eliminating certain kinds of messages from public scrutiny.

Thank you.
