**Subject:** All government records need to remain public...

Good morning,

I wanted to write as a Wisconsin citizen and taxpayer of 27 years that it is critical that communications by public employees with any individuals or entities (private or public) involved any way in the performance of their duties is of public record and available to open public access.

Please rescind past policy decisions that restrict this access in any way.

I will be watching to see if my state representatives support open government communications or if I should support and vote to replace them by others that do.

Sincerely,

Brian F. Long

Whitefish Bay, WI 53217 USA
