**Subject:** Don't limit access to electronic communications

Dear Public Records Board,

Please reconsider the ill-advised plan to limit public access to electronic communications such as text messages, emails, Facebook posts and any other such communications from public employees.

It's crucial that public access to such records be maintained, regardless of which political party is in power at the moment.

Too much secretiveness is a dishonorable way to run our state government. It is an affront to Wisconsin's long, proud history of open government.

Maria Dietrich
