Subject: Electronic Records ARE Public Records

I will keep this short and to the point. The Public Records Board MUST rescind it's action to limit access to text messages, emails, social media posts and other electronic communications by public employees. Attempting to deem these, or any, communications by public employees as "transitory records" is reprehensible. I believe this to be an attempt by the board and state politicians to find a way to circumvent the opens records law .I will make sure that there are consequences in this election year for ANYONE who attempts to curb access to government.
