Subject: Electronic Records

To All Members of the Public Records Board:

As a life long Wisconsin Resident who has always believed in open and transparent government, it is unbelievable that this board has limited access to public records and has done so in secret! Until the current administration and legislative bodies have come into power, our state has always led the way in open government processes. It would appear that this board is being led by various powers who want to hide their actions under the pretense of "clarifying" current laws and this can only lead us down a very slippery slope, one which will surely have significant and serious implications for the citizens of Wisconsin. Government officials are supported by the people and thus should always be held **fully accountable for their actions.**

it is with utmost urgency that I implore each of you to vote to rescind your action to limit access to text messages, emails, Facebook posts, and other electronic communications by public employees. I urge to you to the right thing and stand with the citizens and not those who will seek to hide behind their actions.

*With deep concern for our government,
Dave Braby
