Subject: Electronic information

Please stop trying to make our government less transparent. The laws put in place decades ago were too ensure that the people of our state could have faith that their elected officials were working for the people and not special interests. There is so little trust in government today and I cannot understand how allowing electronic messages concerning government to be separate from other records would engender anything other than less faith in government.

Just because a political party is in power doesn't mean they should tear down all protections.

Signed,
Michele Renee Tompkins.
