Subject: Electronic or otherwise public records belong to citizens

Public Records Board,

As your name suggests you are a public board. All records belong to the citizens of Wisconsin. The current government in Madison has already changed good laws to now make anything they want to do legal. The next job is to try and hide everything from the people who voted. If they are ashamed of what they are doing they shouldn't do it, but that requires a conscience.

The citizens have a right to know what their elected representatives are doing in their name. There is an old saying, "Power corrupts, absolute power corrupts absolutely. So far they've accomplished the first part of the saying, don't give them the second.

Thank you,
Ann Ousterling
