Subject: Electronic public records

To the Board:

I strongly urge you to rescind the limits you have placed on public access to all electronic records generated by public employees. A public employee is just that: a person who is employed by the public, the citizens of the State. This includes all of you! We pay your salaries, and, consequently, you are supposed to work FOR us to ensure that we and the free press can monitor the actions you take that affect all of us. If the people who work for us - from the Governor on down - don't want their actions monitored, they should find other work.

Thank you.
