Subject: Electronic records

Dear Public Records Board:

As you know, you are a public employee of the tax payers of Wisconsin, and as such, the public has the right and responsibility to make sure our public servants are protecting us from corruption if that should occur. Please reverse your decision to to limit public access to electronic transmissions so we the public can make sure those in government are serving the best interest of our state.

Just as any employer may scrutinize their employees' email on company time, it is of utmost importance that public officials are beholden to their constituency. Let us not go down the slippery slope of hiding information from the public. Let's keep public records in any form public.

Sincerely,

Steve Chojnacki & Kathleen Drury
