Subject: Public Records

To the Public Records Board,

My husband and I would like you to know that we are in favor of the Public Records Board rescinding it's action of limiting access to electronic communications by public employees including, but not limited to: text messages, emails, Facebook posts, tweets. We feel that by limiting public access to such electronic communications, it will allow public officials to conduct business secretly without being held accountable to the public.

Thank you for your time and consideration,

Dave & Betty Schmidt
