To The Members of The Public Records Board:

I'm writing to all of you in total disgust as to your representation as "public members" of a group that is attempting to keep the citizens of the former great state of Wisconsin in the dark as to what their government agency is doing to keep any records of their boards communication secret from the people that are paying for the board to exist. The Citizens of Wisconsin know that each of you are simply puppet designee's of elected officials of the State and, no doubt, carry the thoughts of your designator to maintain these imbecilic, secretive records and information from the voters!

Thank god there is an election in our near future for the public to pay attention to the ridiculous negative secret attempts to pay homage to individuals who have power enough to get corporate welfare from the State and it's Wisconsin Economic Development Board. When I first heard of the Board's donation of a \$500,000 grant to an entity that won the grant on "False Information" my thought was that this will be rectified and overturned in no time. I was greatly wrong in that assumption and place the secrecy involved in hiding those facts on both the WEDC for it's approval of the grant and to all of you for standing behind the Governor, and his WEDC, to not allow the paperwork, e-mails, etc. to be public record.

I thank the Milwaukee Journal Sentinel for bringing this situation to the public - albeit at the last minute. Public service carries with it great responsibility and I strongly suggest that each of you, and your sponsoring elected officials look inward as to your morals, honesty, dedication to the public good and to the citizens of the "former Great State of Wisconsin".

Most Sincerely,  
Russell Dagon
