Subject: In regards to the Open Records changes

With regards to your recent changes to the public records law and policy.

These changes are disgraceful, not only to the WI public image, but to policy decisions throughout the Governor's office and Legislature. WI formerly had a reputation for honesty, fair dealings, and allowing input from all sides of a debate. You and your colleagues have made a mockery of the once great WI Politics reputation, and have all but destroyed any chance of returning to that model without a change in leadership, starting with the Governor's office, and continuing through the Legislative branches.

I have written you in response to this editorial, from the Milwaukee Journal Sentinel.
