Subject: Limited Access to Work Product

To Whom It May Concern:

The continual attacks on the taxpayer's right to know what their employees are up to is unacceptable. Both parties made promises of maintaining and even improving access to all work product produced by public employees. I'm disgusted with the continuous Republican attempts to circumvent and even change laws to keep the taxpayers and voters in the dark regarding how government is conducted in our names. I expect more not less access to any electronic (emails, letters, schedules/calendars), and paper records produced and received by any public employees, Governor on down, while I am paying them. I have voted in every election since becoming eligible to vote. My vote in the upcoming elections will be dependent on how this matter is handled by your committee.
