Subject: Limiting Access to Public Records

I consider myself pragmatic when it comes to politics. I rarely comment or become involved in political issues or controversies. However, I do feel that my government should be transparent at all times. As such, I find any efforts to control the dissemination of information from my government to be an assault on this transparency. I am opposed to any past, current or future efforts of this board to control information that is created by my elected and appointed public government officials.
