Subject: Make Public Records more transparent to the people.

Dear Sirs:

It is time to halt any attempt to curb public access to government communications that have long been held to be part of the public record especially texts, emails, Facebook messages and other electronic methods that public employees use to communicate about official actions.

Here's a better idea: Make sure everyone in the Walker administration, Legislature and Local government understands that the public's records belong to the public and should be retained in every case. Anything less undermines open and transparent government.

Respectfully,

Gilbert A Frank
