Subject: NO to hiding Public Records

To the Wisconsin Public Records Board,

I find it indefensible that our State GOP political leaders (and followers) are thinking about hiding our right to access public electronic records. Are those individuals also passing legislation making it permissible for those working in the Private Sector to hide their electronic records from the people who write their paychecks or is this SPECIAL treatment for only those high and mighty ones in Public Office? This begs the question; "What are they afraid of?" I know for a fact that bank robbers don't like cameras in or around the banks when they are performing their jobs.

If these people would like to keep their work emails and other electronic records private, then those individuals should quit working in the public sector and go to work in the private sector. This is an outrageous act and I will do my sworn duty to help remove them from office. How this action could be in any way construed to be in the "best interest of the voters" is beyond me. This has been a sad year for the voters of Wisconsin.
