Subject: Open Records - the RIGHT of ALL citizens

The citizens of Wisconsin have the right to ALL communication that public employees (including politicians) are having, while receiving paychecks from the taxpayers. This includes anytime they are doing anything that is job related. This is no different than what an employer is entitled to, regarding an employee's activities. It is not limited to paper, verbal, written, electronic, or any other specific form of communication. As long as there is a person who is delivering a message, and one or more who are receiving a message, it is communication. We're tired of the corruption, which is not only taking place in Manitowoc County.
