Subject: Open Records suppression

I find it extremely disturbing that our elected State of Wisconsin officials continue to push forward with their efforts to pass laws barring the public's right to access public records of all forms. We the people of this state elect individuals to public office to, manage and govern with honor, honesty, and integrity, for the betterment of society and the protection of our State's assets. It is narrow minded and short sighted to pass or change laws or rules for personal political motives. Besides being immoral and unethical, those actions will someday return to bite them where the sun does not shine. In the short term this may seem to be appropriate as a method of sneaking their political will on the opposition, but the opposition will at some point in the future regain control. This may result in retaliation by those bent on revenge. For the opposition this may be satisfying, but this is not how the government should be functioning. We need our government to discuss, debate and compromise the best, environment, standard of living, and life sustaining programs, for the citizens and the state for now and into the future. We must stop this winner take all attitude, Greed, bribery of our elected officials by SUPER PACS, and keep the actions and dealings of our government out in the open. We the people of this state and country not only deserve it, but also demand it. Please retain complete open record laws and stop the shenanigans.

with regards

Wayne L Rosenow
