Subject: Open records

If Wisconsin legislators, public officials, employees were proud of their work for us they would want every piece of it available for us to see. Electronic information is not "transitory". All types of information used to conduct the business of the state are equally important, and citizens have the right to open access of it all.

Message to public employees: If you are doing business that you want to hide from your taxpayer employers, then you know it's not right. We deserve open government and records!
