Subject: Policy on electronic records

I strongly urge the board to reconsider and reverse its July 2015 action regarding such electronic communications as text messages and social media posts. These type of messages are no less important than other written communications, and will be even more common means of discussion and negotiation in the future than they are today. As such they are clearly included in the intended meaning of our state's open records laws and should be available for public scrutiny in the same way letters or other paper communications are.

Regards,
