Subject: Public access to government records

Sent from my iPad

Dear Board Member,

It is wrong for Wisconsin to hide its business from its citizens. When the hidden communications involve the use of taxpayers' money, it is of great importance to voters to know exactly how the money is being handled and any justification for the expense. This should include electronic messages. The spirit of the open records law includes all communication by government employees no matter the form. Please honor the spirit of our law.

Sincerely,
Mary K Ploeser
