Subject: Re: Electronic Records should be open and available

Thank you for allowing the public to comment about access to electronic records. I believe that the records should be accessible as the ultimate decision on matters rest with the public. Government representatives need to know the people they represent are concerned, and rightly so, about issues that will affect them. The only way to ensure that representatives are doing the will of the people is for the people to understand what their representatives are doing and why. That can only be accomplished when all the information is available. Please restore trust in our state government by keeping the records open and available.
