Subject: Rescind its action to limit access to text messages, emails, Facebook posts and other electronic communications by public employees.

My wife and I have lived in Wisconsin all of our almost 70 years. These last years with the issues that have been changed in this state is unbelievable to us. When voting for the governor and other elected officials; I would have never thought that they would place such importance on changing the right of residents of this state to know what is going on in government. With all the real problems that this state has, changing open records should not be on the top of your list. The action to limit access to text messages, emails, Facebook posts and other electronic communications by public employees falls under this same rule. Keep record open for all to see; unless you have a problem with the voters knowing what you are up to.
