Subject: Restore Full Public Access to All Government Electronic Communications

To the Members of The State of Wisconsin Public Records Board,

We are writing to inform you of our strong opposition to the Wisconsin Public Records Board's action to restrict, limit, or in any other way prevent public access to the electronic communications (emails, Facebook postings, text messages, etc.) of public employees and elected government officials who function as public employees and public servants.

Any attempt or maneuver on the part of the Wisconsin Public Records Board to restrict, limit, prevent, or impede public access to the electronic communications of public employees and elected government officials is unacceptable and highly reproachable.

Now is the time for the each member of the State of Wisconsin Public Records Board to stand up and do the right thing, the proper thing, for the people of Wisconsin - rescind any and all limits and/or restrictions to public access of the electronic communications of public employees and elected government officials. To fail to do this is an affront to every citizen of the Badger State!

Standing in support of a strong, vibrant, and free Wisconsin,

Michael and Carole Raap
Franklin, Wisconsin
