Subject: Reverse Public Records Board decision to limit electronic message access

I have made the midnight deadline to provide my comments regarding the decision the Board made this summer. It is not appropriate to limit access to electronic messages sent and received by public employees such as e mail, texts, etc. As public employees, their business dealings and their decision making process needs to remain public. Citizens need to remain in the information loop.

The Board's decision appears to have been made in a shadowy or secretive manner. That appears to have started this slippery slope, so to speak. Therefore please rescind the limits you placed on access to electronic messages/records and bring the business of public employees back into the open for the public to regain access.
