Subject: STOP trying to limit access to government records

I am contacting you to implore you to STOP tampering with access to our government's information.

It is an outrage that, in this age of information where we enjoy the such an incredible ability of digital tools to store, preserve and facilitate access to records, that our government leaders should even consider minimizing the importance of ANY record simply because they ostensibly deem it "transitory."

We live in a democracy, and We The People have a right to government information in all of its forms. It is essential not only for lawyers, legal professionals, but especially for the general public to be able to fully understand our laws, how they were promulgated, and the intent behind them. This action suggests a secrecy on the part of our state government which is reminiscent of Communist governments during the Cold War Era - NOTHING LESS.

Instead of trying to make secret that which the public has a right to access, you should be making every attempt to make this available to the public IN GOOD FAITH.
