Subject: The need for open records

Public records - all of them - MUST remain public, no matter what form they take. The government's business is the people's business and they have a right to see how decisions were reached.

I'm old enough to remember when Wisconsin had one of the cleanest governments in the country. This is no longer so. The special interests have far more influence on the governor and legislature than the people that put them there.

THE ONLY REASON TO CONCEAL THESE PUBLIC RECORDS IS TO COVER UP CORRUPTION!!! Any part of the government that advances the concealment of these records has to be corrupt, since no honest person should be afraid to let the facts be known.

Do the right thing and keep the records open and available.
