Subject: Transitory Records

I do not agree that electronic records are all temporary records. Please do not use today's technology to aid in the corruption of government. We have enough of that already. If electronic records can be considered temporary, then certain records should not be allowed to be done by email, etc. Do we really want to take time for that debate? There are serious problems our government is currently not solving that need attention. Have all records open, honest and above board. No electronic transitory records, please. Why should that be a problem? Oh, this email can be open and read by anyone who so desires. Unlike our government representatives who evidently must have something to hide, I do not.
