Subject: Wisconsin Open Records

I am writing to voice my agreement to the Milwaukee Journal Sentinel article today 1/6/16. Wisconsin government, elected officials and salaries that I pay for should have an expectation that their communications be open to Wisconsinites. We aren't talking about their medical records which are private, we are talking about their other communications. I am really tired of Scott Walker and his administration trying to hide its events. He did the same crap when he was county exec. – we just couldn't catch him. What about the college records that we can't seem to get hold of?
