I have previously requested that all records be subject to the Public Records Statutes. There should be no exceptions.

What this Governor and Legislature has done affirms my decision to go from an active member of the Republican Party to an independent and now to active opposition to Wisconsin Republicans.

These attempts by Walker and Voss and by administrative bodies can only mean there are matters that these politicians want to hide.

Failure by the Public Records Board to reverse its previous actions will be evidence that what is being withheld are serious matters, the type that will end political careers.

If the Board fails to reverse its actions I for one will expect the media to do whatever is necessary to expose what Walker and Voss are hiding.
