**Subject:** no limit to public records

it makes me think you are afraid that the public will see what you are actually doing.

We have the right to see all records. and the decision should not have been buried in the meeting notes.

This demonstrates why citizens are so sick of their elected officials and are wary of anything that comes out of their mouths.

Whatever happened to open and honest government. Instead we have partisan politics. where each side is try to have a "gotcha" moment.

You should all be ashamed of what Wisconsin politics have become. Such a sad state. Make the first step and reverse this decision
