**To:** DOA Public Records Board Comments  
**Subject:** public access

We are sending our comments that restrictions to limit access to social media and emails should be rescinded. Government integrity is being usurped. Secrecy spawns corruption. Accountability cannot be reviewed when important information is hidden. The fact that such information wishes to be limited is a red flag and threatens the democracy this country was founded on. If the politicians want to work for corporations, then get off the public dole. Otherwise be accountable to the People.
